#CHALLANGES

During the developing phrase of this program I have faced different types of challenges. First of all I have to bult a box for this game which takes lot of my time for it's logic. After that I have face many errors which kills my time around 3 hrs . After fixing that error my biggest challenge is to create computer player. After all I have finished my corsework.

#ABOUT COMPLETING THE TASK

 To complete this task first I made a rough blueprint . And then I start my work by following the blue print which I have made earlier. It's make easy and help lot throught the program. To complete this task I take some references from the social media and websites.

#THINGS THAT I LEARNED FROM THIS CORSEWORK

During this course work I have learned to how to use function properly & how to fixed errors. It's helps me lot to learn about python program . It's help me to develop my logic .I have learn to write a program in proper manner .
